Boston, MA 02109

To whom it may concern:

As a resident of coastal Connecticut, the Long Island Sound is a critical contributor to my family's quality of life and the economic vitality of my community and region. Federal, state, and local efforts to protect and restore the Sound are beginning to bear fruit. We are in danger of sliding backwards, however, with new proposals to continue and even expand open water dumping of dredged materials, which is unnecessary and dangerous.

New York and Connecticut agreed to phase out dumping in the Sound in 2005, and yet now we are faced with a long-term plan to continue using it as a dumping ground for dredged material for 30 years and to add yet another dump site. This is disappointing leadership at best. It will contribute to harmful nitrogen pollution and adversely impact bottomlands.

EPA should honor the 2005 agreement and phase out dredge dumping in Long Island Sound. Our leaders in Washington should support beneficial reuse of dredged material as a safer alternative to open water dumping.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kristin Schneeman", with a long horizontal line extending to the right.

Boston, MA 02109

Docket: EPA-R01-OW-2016-0239  
RE: Dumping of Dredge Material in Long Island Sound

I am writing out of concern for the EPA's plan to allow continued dumping of dredge material in and around Long Island Sound. These materials increase nitrogen levels in our waters, contributing to algae blooms and fish kills, as well as elevating PCB and heavy metal levels in wildlife. Our coastal wetlands, rivers, beaches, and Long Island Sound are crucial to our area for both environmental and quality of life reasons.

We DO NOT support the continued operation of the Cornfield Shoals and New London Disposal Sites, nor do we want to see a new dump site in Niantic Bay. There are alternate uses for these materials that will not negatively impact life in and around the Sound.

Thank you for your consideration.

To Whom it May Concern:

The young lady that came to my door with this petition reminded me of an issue I had forgotten about. Dredge Dumping in Long Island Sound. Terrible! Repeating mistakes of the past, with a dangerous plan that has environmental consequences.

I know Long Island Sound well. I have been SCUBA diving in its waters for almost 40 years. I know well how foul and smelly the water was in the late 1970's. I remember the trash and refuse that still lingers on the bottom, caught on along reefs and obstructions. I remember the fish die-offs due to lack of oxygen in the water, due to pollutants. I remember the lobster die-off due to the malathion sprayed in the water to combat West Nile virus. I have dove in some of the deeper pockets of the sound where dredge dumping has occurred. Thick layers of muck and sludge where basically nothing grows. You have to be careful not to get stuck in it, or you run the risk of not being able to free yourself. Nothing can really grow there, because of the consistency of the sludge, doesn't permit it. Dumping regulations were changed in the late 1970's early 1980's, and I have watched the sound recover to a degree. Water visibility on the North shore of Long Island has risen on an incoming tide to 5-6 feet vs. the blackness of inner harbor dives in Bridgeport or Norwalk harbors. I've seen fish back that previously we thought were going to vanish. I've seen whelk beds that we thought would never recover, come back. Why on God's earth would we want to again, damage this fragile ecosystem.

Dredge dumping will bring toxic chemicals, that could have or should have, been left buried. There are other options for this material. When GE was mandated to cleanup the upper Hudson, the PCP and other contaminants, once re-dredged, again went into the water column and spread downstream. Why would we want to run that risk. The Long Island sound is one of Connecticut most valuable natural treasures, if not it's greatest. This fragile closed end estuary, needs more protection not less. Gone are the days when I will actually eat, any fish, especially bottom feeders, (Shellfish, lobster, crab), from Long Island Sound. But, I thought we were trying to move in the right direction and resource this natural beauty so that some day we might. Dredge dumping is short sighted. It's the cheap easy way out, instead of doing the right thing.

Save our Sound. It is a wonderful body of water we need to protect for our future generations. Please oppose this measure. Your grandchildren will thank you for it.

Timothy E. Carey

Boston, MA 02109

Dear Sir or Madam:

Subject: Docket EPA-R01-OW-2016-0239

I am writing this letter in opposition to the dumping of dredged material in Long Island Sound. Specifically, I am opposed to the proposed extension of the use of the Cornfield Shoals Disposal Site (CSDS) and the New London Disposal Site (NLDS), as well as the establishment of an additional dumping site in Niantic Bay.

As you know, the Long Island Sound is an estuary of national significance, injecting billions of dollars into our regional economy each year. The Sound is home to more than 120 species of finfish and countless varieties of birds and other animals. Over the past several years, the Federal and local governments have spent millions to protect and restore the Sound, and those efforts have seen an increase in certain species of fish, whales, and dolphins in the area. This progress is now threatened by the proposal to continue to allow dumping of dredged material in the CSDS and NLDS, as well as to permit dumping at a new site in Niantic Bay.

I respectfully request that you oppose the EPA plan to extend the life of the two existing dump sites, as well as to open a new dump site, in Long Island Sound. Please support the beneficial reuse of dredged material, such as in beach nourishment, constructing wetlands, capping landfills, and filling in abandoned mines.

Sincerely,

A handwritten signature in dark ink, appearing to be 'C. Shea', followed by a long horizontal line extending to the right.

Boston, MA 02109

Dear EPA,

I oppose dumping dredged material in the Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

I grew up in Westport and in spite of the pollution, mostly PCBs, I enjoyed swimming in the Long Island Sound at Compo Beach, jumping off the deck of my father's boat "Skip Jack," and clamming in the mud along the Saugatuck River at low tide. It wasn't until I was in my 40's that I learned about the hazards PCBs and their connection to the cancer that took my father's life that I realized how serious the issue of dumping in the sound is.

If you have not already done so, please take the time to learn about alternative options to reuse the dredged material to protect future generations and, in turn, inform me of your position on this issue.

Thank you,

A handwritten signature in blue ink that reads "K Sorrentino".

Re: Docket: EPA-R01-OW-2016-0239

Dear Sir/Madam,

I oppose dumping dredged material in the Long Island Sound. The ocean is already suffering from the effects of global warming from human activity; the last thing we need to do is to continue dumping waste and garbage into the ocean. I don't understand the logic of dredging past pollution only to move it further into the ocean, nor do I understand why more disposal sites are being created in the ocean in spite of all that we know about past dumping of waste and garbage. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

Thank you in advance for your prompt attention to this matter.

Sincerely yours,

Sujin Cho

The following is a copy of the letter I've sent to Senators Murphy & Blumenthal, and Representative Larson:

I am writing to express my objection to the USEPA's proposal to continue open water dumping of dredged materials in Long Island Sound. The States of New York and Connecticut agreed to phase out this practice in 2005 and move toward the reuse of dredged materials in environmentally responsible and beneficial ways. The USEPA's plans to grant a 30 year permit to two sites in the eastern LIS and to open a new dumping site in Niantic Bay is a breach of public trust and yet another example of government waste and inefficiency. The federal government, state and local municipalities have spent millions of dollars to protect and restore the Long Island Sound – an estuary of national significance as well as a source of food and an economic engine regionally – and those efforts have begun to show results. The Dredged Materials Management Plan was supposed to support these efforts and serve as a guideline for the reuse of dredged materials, not undermine them. Allowing the USEPA's proposal to move forward would render the millions of taxpayer dollars spent to revive the LIS a waste of resources as all of the positive change that has occurred would be undone by the 30-50 million cubic yards of dredged materials that could be dumped there over the next 30 years. Fish contaminated with increasing levels of PCBs and elevated heavy metal levels in shellfish as a result of nitrogen pollution from dredged materials puts human health and the health of local businesses at risk.

American voters have never had less confidence in their government and legislators to effect change and protect their interests. The USEPA's proposal of new dump sites in LIS is merely one example of the kind of irresponsible planning that has eroded the public's trust. Beneficial reuse options for dredged materials exist. They include wetland construction, capping of landfills, filling abandoned mines and beach nourishment. If beneficial uses exist and could generate income potentially (if dredged materials from LIS were used to fill the 3000+ abandoned mines in Pennsylvania), the responsible course of action is to pursue them. The USEPA appears to have forgotten that its responsibility is to protect the environment in which its citizens live. I implore you to remember your responsibility to your constituents and remind the EPA that the Long Island Sound is NOT a landfill.

Sincerely,

A handwritten signature in black ink, appearing to read "John M. Paluso", with a long, sweeping horizontal line extending to the right.

Re: docket EPA-R01-OW-2016-0239

To Whom it May Concern:

I am writing because I oppose dumping dredged material in Long Island Sound and to ask that you stop the proposed extension of the permits for the Cornfield Shoals and New London Disposal Sites in the Long Island Sound, and block the establishment of an additional dump site in Niantic Bay. There are other methods to dispose of this material that won't damage the environment.

Long Island Sound is an estuary of national importance and a state treasure, not a landfill. Please help to preserve and protect it.

Sincerely,

A handwritten signature in cursive script that reads "Eileen Peltier". The ink is dark and the signature is fluid.

Dear U.S. EPA,

I oppose dumping dredged material in LIS.  
Please reject the extension of the CSDS  
and NLDS and establishment of a Narragansett  
Bay Disposal Site.

I oppose the EPA plan to open a new  
dump site and extend the life of two  
existing sites in LIS, and instead support  
beneficial reuse of dredged material as  
a safer alternative to open water  
dumping.

Sincerely,

John, Allison,  
and Inara Fallon

I oppose dumping dredged material in Long Island Sound. I use my boat in the sound and would not

like to run into dredged material and "wing" my prop or damage my boat. I oppose the extension of CDSC and NLDS and establishment of a Niantic Disposal site.

Please vote as necessary so this dredging is not allowed.

Sincerely,

A handwritten signature in black ink, appearing to read "David Carlton", written in a cursive style.

David Carlton

To Whom it may Concern at the U.S. EPA,

I oppose dumping dredged material in Long Island Sound!

Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay dumping site. Please keep your promise to phase out dumping in the sound that you agreed to a decade ago! The long term health of Long Island Sound is very important to me as I own property along the coast of Niantic Bay in Black Point and regularly use and fish its waters. I have seen a dramatic decrease in the amount of fish and lobsters over the past 20+ years which is bad for the economy and environment and dumping potentially hazardous dredged waste back into the sound certainly will not help! Please support beneficial reuse of the dredged material as a safer alternative to open water dumping and find a way to make money with it to off-set the cost. I know it can be done! Thank You.

Sincerely,

Matt D'Agata

## Long Island Sound is NOT a Landfill Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

## Long Island Sound is NOT a Landfill

### Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives
